### **INTRODUCTION**

Thank you for choosing a Utah Sandar product. We are convinced that your choice will prove to be a wise and worthy decision for many years to come.

Your Utah Sandar product has been tested for performance at the factory according to the specifications given for the system in this manual. However, before putting the device into operation we kindly ask you to read this manual, and act according to the information given.

All information given in this document is property of Utah Sandar. To the knowledge of Utah Sandar there are no errors in the manual. Should any errors be discovered, please notify Utah Sandar. Utah Sandar will under no circumstances accept responsibility neither for errors in this manual, nor consequences of such errors.

#### **Utah Sandar AS**

Thorøyaveien 11 N-3209 Sandefjord, Norway

Tel.: +47 33 52 27 00 Fax: +47 33 52 27 01

#### **WARRANTY**

This Utah Sandar product is warranted against defects in materials and workmanship for a period of two (2) years from the date of invoice. During the warranty period, Utah Sandar will, at its option, either repair or replace products that prove to be defective.

The warranty shall not apply to defects resulting from improper or inadequate installation or maintenance by buyer, buyer-supplied software or interfacing, unauthorized modification or misuse, operation outside of the environmental specifications for the product, or improper site preparation or maintenance.

If a product needs to be returned for service, please first contact the Utah Sandar Helpdesk to obtain a Return Material Authorization (RMA) number. Make sure the packaging provides sufficient protection against ESD and mechanical damage. Please enclose a note with the RMA, return address, contact person details and a failure symptom description.

#### **DOCUMENT REVISION HISTORY**

Rev.	Date	Description			
1.0	2010-01-13	Changed the specifications			
В	2009-10-26	Changed Company and product name			
Α	2009-06-02	Preliminary			

#### **SAFETY & ENVIRONMENT**

#### General

This product and related documentation must be reviewed for familiarization with safety markings and instructions before operation. This product has been designed and tested in accordance with the relevant international standards.

## Safety Symbols

Indicates hazardous voltages.

Indicates earth (ground) terminal.

The **CAUTION** sign denotes a hazard. It calls attention to an operating procedure, practice, or the like, which if not correctly performed or adhered to could result in damage to or destruction of part or all of the product. Do not precede beyond a CAUTION sign until the indicated conditions are fully understood and met.

The **WARNING** sign denotes a hazard. It calls attention to a procedure, practice, or the like, which, if not performed or adhered to could result in personal injury. Do not proceed beyond a WARNING sign until the indicated conditions are fully understood and met.

## Safety Earth Ground

This is a Safety Class 1 product (a protective earth terminal (Ch) is provided). An uninterrupted safety earth ground must be provided from the main power source to the product input wiring terminals, power, cord, or supplied power cord set. Whenever it is likely that the protection has been impaired, the product must be made inoperative and secured against any unintended operation.

#### **Environment**

**WEEE**: All Utah Sandar products will comply with the EU Directive 2002/96/EC on Waste from Electrical and Electronic Equipment aka WEEE directive. Please contact your local Utah Sandar sales representative for information about returning these products for safe disposal/recycling. Utah Sandar equipment that complies with the directive will be marked with a WEEE-compliance emblem.

**RoHS**: All Utah Sandar products will comply with the EU Directive 2002/95/EC on Restriction of Hazardous Substances aka RoHS directive. Thereby not containing above the limits specified in the said directive of any of the banned substances. Utah Sandar equipment that complies with the directive will be marked with a RoHS-compliance emblem.

Exempt: Spare/Expansion parts for older systems are exempt from the directive.

### **INSTALLATION**

#### Initial Inspections

Check the contents of the shipment for completeness and possible transport damage. If the contents are incomplete or damaged, contact Utah Sandar AS immediately for repairing or replacement parts of the equipment.

#### ESD Handling

This product may contain Electrostatic Sensitive Devices (ESD).

Precautions to minimise the risk of damage, due to electrostatic discharge during handling, are recommended. For guidance, refer to British Standard BS CECC 00015, Part 1: BASIC SPECIFICATION FOR PROTECTION OF ELECTROSTATIC SENSITIVE DEVICES

#### **Before Applying Power**

Verify that the product is configured to match the available main power source per the input power configuration instructions provided in this manual and product marking.

#### Service

Servicing, adjustments, maintenance or repair of this product may be performed by qualified personnel only. Adjustments described in this manual may be performed with power supplied to the product while protective covers are removed. Energy available at many points may, if contacted, result in personal injury. Capacitors inside this product may still be charged even when disconnected from their power source.

#### GENERAL DESCRIPTION

The UTAH100/X16V Compact 16x16 Wideband Router fully complies with the relevant standards for PAL and NTSC and Wideband formats. The router has a multi-sync loop through input that handles bilevel and tri level sync. Having both an Ethernet SNMP/HTTP/SanEth) and DSUB9P RS-232 interface for remote control and configuration makes it very adaptable to any 3rd party control system.

16 LED's in the front lit in presences of signal on the outputs.

The Power consumption and the heat dissipation for the UTAH100/X16V family is low saving the environment and giving the products a long lifetime.

The UTAH-100/X16HD is delivered in four models:

Model UTAH-100/X16V : 16x16 with 16 LEDs for signal presences in the front.

Model UTAH-100/X16VCP : 16x16 with Push Buttons in the front 16 for outputs selection and 16

for input selection.

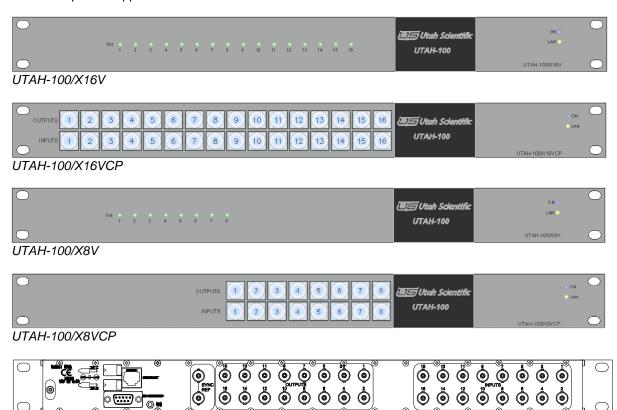

Model UTAH-100/X8V : 8x8 with 8 LEDs for signal presences in the front.

Model UTAH-100/X8VCP : 8x8 with Push Buttons in the front 8 for outputs selection and 8

for input selection.

The UTAH100/X16V is delivered with a standard off-the-shelf universal AC/DC converter. Two Independent power inputs are provided to enable redundant supplies.

The 19" wide, 1RU high and 60 millimetres deep frame houses the switch, local control unit and RS-232 and Ethernet remote control interface. Two 12 VDC 2.1mm power input connectors enable use of redundant power supplies.

### External Power Supply

The external Power Supply is an AC/DC Switch Mode desktop power supply module with compact design. The power supply has a universal input voltage, with 3 pins IEC 320 connector. The output voltage is 13.2 VDC and is short circuit proof and deliver up to 40W. One secondary cable with the modular connector in the one end connects to the power supply and the other end with a 5.5/2.1mm jack connects to the UTAH-100/XHDA frame. Utah Sandar recommends the Power Supply 9920 from Mascot A/S, but other types of Power Supplies may be used with similar specifications. *Mains cord is not included.* 

Mounting bracket is available.

## **UTAH-100 CONTROL SOFTWARE:**

- For Quick Start Guide see the attached document in the delivery.
- UTAH-100 Control Software see the document file: UTAH-100-ControlSoftware10.pdf attached in the user manual CD.

#### **PINOUT**

#### **Power Connection**

The UTAH100/X16V units have two 2.1mm DIN 12VDC connector with + at centre.

The power unit supplied for the UTAH100/X16V is a 12 VDC with a max rating of 0.8A (10W)

#### Port Pin Orientation

#### **Ethernet Port**

The Ethernet port is an 8-pin RJ-45 jack meeting the requirements of ISO 8877 for 10/100Base-T.

Ethernet Pin Assignment						
Pin	Signal Name	Figure				
		RJ-45				
1	TxD+ (Transmit Data)	12345678				
2	TxD- (Transmit Data)					
3	RxD+ (Receive Data)					
4	Not used					
5	Not used					
6	RxD- (Receive Data)					
7	Not used					
8	Not used					

RS-232 Port

Serial port, RS-232 is a DSUB9pin (male) connector. Use the following figure and tables for pin orientation and pin assignment information.

Serial Pin Assignment									
Port	Signal Pin1	Signal Pin 2	Signal Pin3	Signal Pin4	Signal Pin5	Signal Pin6	Signal Pin7	Signal Pin 8	Signal Pin 9
RS- 232	Not connected	RxD	TxD	Not connected	GND	Not connected	Not connected	Not connected	Not connected
